To whom it may concern

Future Products Group is a global leader in retail food display solutions, with our Head Office and main manufacturing facilities based in Napier, Hawkes Bay.

Early last year, Derek Leadbetter demonstrated the new paperless web based Planned Maintenance system.

I was extremely impressed by the ease of the system, which has integrated seamlessly into our company procedures.

I have no hesitation on recommending both the PM Online Software System, and Hawkes Bay Planned Maintenance, to any company looking to enhance their maintenance procedures.

Jared Vaughan
General Manager
